Main parameters of XCMG Wheel Loader LW300FN
Rated load: 3 tons
Bucket capacity: 1.8 m³
Dumping height: 2930mm
Dumping reach: 1010mm
Operating weight: 10 tons
Main configuration:
* Dry drive axle
* Fixed axle box for LW300FN
* Chinese made tyres
Optional parts:
* A/C
* 1.8m³ Blade bucket:
* 2.1m³ Light material Blade bucket
* 2.5m³ Light material Blade bucket
* 1.8m³ Reinforced bucket

Description of XCMG Wheel Loader LW300FN

Advantages of XCMG Wheel Loader LW300FN
* New skeletal structure cab, VDO instrumentation, large space, vision, industry-leading comfort. * Mature classic transmission parts, axle box and set the engine to achieve the best match, energy efficient. * Traction ≥ 9.0 ton breakout force ≥ 12.0 tons, industry-leading operating capacity, to conquer a variety of adverse conditions. * Bucket-type optimization, insert a small resistance, high coefficient of the full bucket, the shovel has an outstanding ability. * 2600mm wheelbase, the turning radius of 5165mm (center of tires), flexible, strong ability to adapt to the venue.
* It can be configured to increase the bucket, wooden clip clamp, grass fork, grab the machine, sweeping machines and other equipment to meet a variety of working conditions.

ZL30G is a classic model of XCMG 3t loader, from 2009 ZL30G was updated to XCMG LW300F and then XCMG LW300FN. Now LW300FN is the most popular model of China 3t wheel loader. New model LW300FV equipped with EURO III engine with the electric injector, the new model will have high performance. China II emission standard, high performance and low fuel consumption;
Powerful and high torque reserve coefficient, able to meet loads requirement instantly and provide power required for operations with heavy and large load;
Dead-axle power shift gearbox, featuring maturity and excellent reliability;
Three-element torque converter guarantees maximum utilization of engine power;
The flange of drive shaft complies with international standard with increased diameter of
fixing bolt circle, featuring extra-strong resistance to torque for continuous operation with high strength and heavy loads.

Our competitive prices, On time machine supplying, Professional suggestion, Machine free warranty and Available parts supplying will be your good support partner in future.
